Enterprise Learning Management That Addresses Complexity and Compliance

The learning and development landscape is constantly evolving alongside shifting business objectives, talent demands, and regulatory requirements. Now more than ever, mid-to-large enterprises must employ data-driven and impactful talent development strategies that consider the needs of a diverse and distributed workforce.

PeopleFluent Learning management system provides mid-to-large enterprises with trackable learning and development designed for highly regulated and high-compliance industries. The tool empowers your employees to upskill via continuous learning, apply those skills in their roles, and make improvements over time. Behind the scenes, our best-in-class reporting and tracking allows administrators to track course completion, certifications, and exam grading.

Comprehensive Learning Management Software Providing:

Learning and Development Essentials

Create, manage, and deliver courses and eLearning material. Also, create a data repository for key information on a learner's journey and performance.

Exam Engine

Use the built-in exam engine to evaluate training on multiple levels and configure the exams to set who has access, how they're graded, and who can review the exam. Analyze your workforce and evaluate your training on a global scale.

High Configurability

One size doesn't fit all. Configurability of the system includes notification rules and triggers, in-depth permission and user roles, and system settings and interface customizations.

Skill and Competency Management

Let learners see gaps in their skills and competencies and then highlight related training that will help them close such skills gaps.

Built for Highly-Regulated Industries

Visualize and report on who received training, when they received it, and any changes that are made to administrative functionality to ensure you're able to conduct both learning and administrative auditing.

Designed for Compliance

Comply with all training-related e-signature, validation, audit trail, and data integrity requirements, including 21 CFR Part 11.
